Subject: COLE Turnover

Craig,
Update on the turnover rate. In the specified period (Nov99 - Dec00) they lost 10 CPOs and gained 6, the mess was 26 CPOs. My math makes that a 35.8% turnover, which I think is right in line with the rest of the crew.

Craig,

Attached at the bottom is the enlisted information. I gave you all the underlying numbers just in case it might come in handy. As far as the officer number, I think 48% is the number you are looking for. On the CPO cut, I know that is not in there and I am trying to flush that last piece of information for you, but thought you might like what I have so far.

Sir,

There are two cuts on this:

Strictly by gains, size of wardroom prior is 23, so 56% based on 13 gains.

It appears two of the 13 billets, 1st LT and ASWO did not detach upon gaining a relief. So based on a net turnover of 11 billets, that would be 48%.

Either way it is approx 50%.

V/r,
Kevin
